

# Casa Rural EL SILBO II

## Datos Generales

**description:** This house was originally one house with a small wine cellar. It was converted into three living spaces, two of them large, with similar characteristics, and the smaller, the wine cellar, studio-type. The three houses are very carefully set out with a combination of styles; always based on rustic decoration and furniture.. The dedication given to the conservation of small details creates a profoundly tranquil atmosphere. The patio-garden is the most important element in the exterior of the house, not only because of its wonderful views, but also because of the direct contact it offers us with the island agriculture, being, as it is, surrounded by banana plantations. It also has an old wood burning oven that has been restored and is usable. This accommodation is at 30m from the main road.
